MULTIFIX[◇] S ULTRA Knotless Suture Anchor

The MULTIFIX S ULTRA Anchor provides multiple fixation options as well as a streamlined technique ideal in multi-suture constructs allowing surgeons to meet the needs of a diverse patient population.

MULTIFIX S ULTRA Anchor specifications

Accessories

3.4mm bone punch (OM-9420)

Tapered punch (OM-9220)

Multiple fixation options

The MULTIFIX[®] S ULTRA Anchor allows the surgeon to create various biomechanically stable constructs with two bone lock options.

Functional testing 20/8 lb. foam*

Streamlined technique

- Pound-in technique (bone hole may be required)
- Suture lock with the turn of a dial
- Hand tension sutures for tactile feedback

1. Insert PEEK tip into bone

2. Tension sutures

3. Turn dial to lock sutures

Ideal in multi-suture constructs

- Accommodates 2-4 suture strands to allow multiple construct configurations

* Reference P/N 52553-01 and 47901-02. The results of in vitro simulation testing have not been proven to predict clinical performance. Test results pertain only to the two suture testing

FIRSTPASS[®] ST Suture Passer

The FIRSTPASS ST Suture Passer is a single-use suture passer pre-loaded with a needle and sterile packed allowing for immediate out-of-the-box use.

Two step trigger to grasp tissue and deploy needle

Round pre-curved needle for reliability and strength

Features and benefits

FEATURE	BENEFITS
Pre-loaded and sterile packed for single case use	<ul style="list-style-type: none"> Eliminates the time and inconvenience associated with sterilizing a reusable suture passer Needle loading and unloading are no longer required No capital cost or instrument maintenance needed
Round, pre-curved nitinol needle	<ul style="list-style-type: none"> Provides added strength and reliability Suture is carried in a recess on the needle which helps maintain suture integrity
Deep bite	Allows for tissue manipulation and suture passage through cuff tissue, up to 10mm in thickness and 18mm in bite depth
Ability to pass MAGNUMWIRE [®] , ULTRABRAID [®] and ULTRATAPE [®] sutures	The surgeon is not limited by suture type and can make product decisions based on the repair needs

Available in both standard and self-capturing solutions
